

## Benefits

**Fights Fungal Infections:** Ketoconazole targets dandruff and seborrheic dermatitis by eliminating fungal growth. **Controls Itchiness and Flaking:** Zinc Pyrithione reduces microbial activity, relieving itching and scaling. **Soothes Irritation:** Aloe Vera Extract calms redness and inflammation, providing relief for sensitive skin. **Hydrates and Moisturizes:** Glycerine deeply hydrates the skin and scalp, preventing dryness and promoting smoothness. **Improves Scalp Health:** The synergistic action of these ingredients restores balance and promotes a healthier scalp.

## How It Works

- **Ketoconazole:** Acts as an antifungal agent, disrupting fungal cell membranes to combat dandruff and seborrheic dermatitis.
- **Zinc Pyrithione:** Reduces microbial growth and controls inflammation, preventing dandruff recurrence.
- **Aloe Vera Extract:** Provides anti-inflammatory benefits, soothing irritated skin and supporting natural healing.
- **Glycerine:** Attracts moisture to the skin and scalp, maintaining hydration and preventing dryness.

## Side Effects

This product is generally safe for use; however, some individuals may experience: Mild skin irritation or redness. Dryness or tightness of the scalp or skin. Rare allergic reactions, such as itching or rash. If side effects persist or worsen, discontinue use and consult your healthcare provider.

## Expert's Advice

- **Follow Usage Instructions:** Apply as directed on the packaging or as advised by a healthcare professional.
- **Avoid Eye Contact:** Rinse thoroughly with water if accidental contact occurs.
- **Do Not Overuse:** Excessive application can lead to dryness or irritation.
- **Incorporate Into Routine:** For best results, use regularly as part of your hair or skin care routine.
- **Patch Test:** Perform a patch test before first use, especially for sensitive skin.
- **Consult a Doctor:** Seek medical advice if you are pregnant, breastfeeding, or managing severe skin conditions.

## Frequently Asked Questions

### Q. What is this formulation used for?

It is used to treat dandruff, fungal infections, and itchy or flaky scalp conditions while hydrating and soothing the skin.

### Q. Can it be used daily?

The frequency depends on the condition's severity. Follow product instructions or consult a healthcare provider.

### Q. Is it safe for sensitive skin?

Yes, but a patch test is recommended to ensure no adverse reactions occur.

### Q. Does it work on seborrheic dermatitis?

Yes, Ketoconazole and Zinc Pyrithione are effective for managing seborrheic dermatitis.

**Q. Can it be used on the face?**

It may be used on the face if recommended by a healthcare professional, but avoid contact with the eyes.

**Q. Does it prevent dandruff recurrence?**

Yes, regular use can help prevent the recurrence of dandruff and related issues.

**Q. Can children use this product?**

Consult a pediatrician before use on children to ensure safety and appropriate usage.

**Q. Is it suitable for all hair types?**

Yes, it is suitable for all hair types and specifically addresses scalp health concerns.

**Q. Can it be used with other hair care products?**

Yes, but avoid harsh shampoos or products that may cause irritation.

**Q. How long does it take to see results?**

Visible improvements are typically noticeable within **2–4 weeks** of consistent use, depending on the severity of the condition.
