Expert's Advice

Expert's Advice

- **Timing:** Take the medicine 1 to 3 hours before planned sexual activity.
- **Frequency:** Do not take it more than once in 24 hours.
- **Alcohol:** Avoid alcohol as it may increase side effects like dizziness and fainting.
- **Driving Caution:** Avoid driving or operating heavy machinery until you know how it affects you, as dizziness or drowsiness may occur.
- **Blood Pressure:** Rise slowly from sitting or lying positions to avoid dizziness from sudden drops in blood pressure.
- **Consultation:** Inform your doctor if you've had a heart attack, stroke, or heart failure in the last 6 months, Report priapism (erection lasting over 4 hours) immediately to avoid long-term damage.
- **Hydration:** Stay hydrated to manage dry mouth and dizziness.
